PROFESSIONAL SUMMARY

A dedicated Information Systems student with a focus on Data Engineering expertise and a strong academic track record. Demonstrated real-world experience building database management systems using MySQL and coordinating technology training programs. Proficient in Python and SQL for data processing, ready to bring these technical skills and communication abilities to a Data Engineer internship role to support enterprise data management.

AREA OF EXPERTISE

- Full-Stack Web Development
- Backend System Development
- Database Management
- Data Analysis & Visualization
- Machine Learning Fundamentals
- UI/UX Design

EDUCATION

Siliwangi University, Tasikmalaya, West Java

Aug 2023 – Present

Bachelor of Information System, Data Engineer Specialization.

GPA : 3.81/4.0 (current)

SMKN 4 Tasikmalaya, Tasikmalaya, West Java

July 2020 – May 2023

Software Engineering

ACHIEVEMENTS

1st Place, Web Technology Competition

Tasikmalaya City Level, LKS (Lomba Kompetensi Siswa), 2022.

WORK EXPERIENCE

Sakata Innovation Center, Tasikmalaya, West Java

Jun 2025 – Dec 2025

Co-Fasilitator

- Coordinated collaboration among schools, teachers, and education authorities to support the implementation of Coding & Artificial Intelligence programs.
- Facilitated learning activities across three training classes and served as the primary coordinator for a class consisting of 27 teacher participants.
- Improved teachers' instructional comprehension through structured mentoring, contributing to an 85% learning achievement rate and a 90% certification pass rate.
- Designed event materials, including banners and participant ID cards, to support program branding and execution.

Antarestar Outdoor, Bekasi, West Java

Jul 2022 – Oct 2022

Full-Stack Developer

- Developed a warehouse management system using Django and MySQL to improve inventory

management and stock monitoring efficiency.

- Built and implemented product, supplier, and transaction management functionalities.
- Designed and launched a responsive e-commerce website using WordPress to support the company's online presence.
- Customized website features and performed testing, debugging, and maintenance to ensure optimal system performance.

PROFESSIONAL DEVELOPMENT

DBS Foundation Coding Camp x Dicoding Indonesia

Feb 2026– Present

Data Science Learning Path

- Selected participant in a highly competitive tech upskilling program, focusing on data architectures, Python programming, and advanced SQL.
- Mastered data wrangling, data preprocessing, and database management modules to ensure data cleanliness and structural integrity for analytics.
- Applied Python (Pandas, NumPy) and SQL to build efficient data processing workflows, optimized queries, and prepared datasets for machine learning models.

PROJECTS

CuanSync - Web Dashboard & Generative AI Business Consultant

- Designed and implemented scalable database schemas using MySQL to handle complex financial transactions and business metrics for SMEs.
- Developed robust backend services and integrated generative AI APIs to process financial data and generate automated business insights.
- Managed end-to-end data flows to ensure real-time dashboard updates and reliable financial state synchronization.

Warehouse Management System & E-Commerce

- Built an integrated product and inventory tracking database utilizing Django and MySQL to manage stock data and transaction logging.
- Developed a product management pipeline that handles dynamic stock updates and structural cash-on-delivery (COD) transaction records.
- Optimized database queries to support stable product catalog performance and secure inventory status tracking.

SIAKAD TK IT Ibadurrohman

- Engineered an Academic Information System using Django to model and store complex relational data for students, teachers, and administration.
- Implemented role-based database permissions to ensure secure data isolation and data integrity across different school administrative divisions.
- Designed dynamic relational data views using Tailwind CSS on the frontend for clean administrative report visualization.

Web Profile HMSI UNSIL

- Developed the profile website for the Information Systems Student Association using Laravel and PHP to serve as a reliable central information system.
- Implemented structured content publishing routes to optimize digital asset and programmatic announcement delivery.

SABUKU Platform

- Developed a student literacy platform with a structured database framework using Django and SQLite to log user book reviews.
- Created data processing forms and submission pipelines that enable efficient handling and storage of student-generated textual content.

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Sistem Informasi (HMSI), Siliwangi University

Mar 2025 – Dec 2025

Member of the Education Division

- Assisted in planning and executing educational and academic programs for Information Systems students.
- Contributed to literacy and knowledge-sharing initiatives to support student learning and development.
- Supported the documentation, publication, and evaluation of departmental programs and activities.
- Collaborated with division members in coordinating events and participating in strategic discussions to improve program effectiveness.

Pengabdian Masyarakat HMSI 2024

Oct 2024

Staff of the Publication, Documentation & Design

- Documenting the entire community service program through photos and videos.
- Designing publication and administrative materials for the program, including pamphlets, name tags, and other supporting materials.
- Managing the program's publicity through HMSI's social media channels to increase the reach of information to participants and the public.

English Based Career Development (EBCD)

Sep 2025

Secretary

- Prepare correspondence and administrative documents for activities.
- Prepare meeting minutes and document discussion results to ensure follow-up on each agenda item.
- Manage activity document archives and support administrative coordination between committees.

Ready Business (REBIZ)

Oct 2025

Head of Public Relations Division

- Coordinate the activities of the Public Relations Division to ensure the smooth running of the event.
- Establish communication and coordination with presenters regarding the technical and administrative needs of the event.
- Manage the distribution of invitations, assignments, and other external communication documents.
- Serve as a liaison between the committee and external parties to ensure information is conveyed effectively.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL
- Frameworks: Django, Laravel
- Frontend: HTML, CSS, Tailwind CSS
- Database: MySQL, PostgreSQL
- Tools: Git, Jupyter Notebook, Figma, Canva
- Others: REST API Development, WordPress Customization.
- Data Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib/Seaborn.

LANGUAGES

Indonesia : Fluent

English : Intermediate
